

SR9000 Gemini Regulator Valve Body Tightening Procedure

- After removing the regulator valve body from the Gemini housing, you will need to secure it in a vise.

- Attach Valve Body Tool (part number GEM-TOOL)
- Align notch in tool with Index notch on demand lever housing

- Using an inch-pound torque wrench, torque unit to 15 inch-pounds. This will provide the proper amount of torque to prevent the two housings from unthreading, which causes the leak.
